Editorial
Proceedings of the Nutrition Society 1942–1997. *Kate Younger* xi–xiii

Obituary
Muriel A. K. Westland *John W. T. Dickerson* xv

Mechanisms of energy compensation *(Symposium Proceedings: 24–28 June 1996)*

Chair: R. J. Stubbs, *Rowett, Aberdeen*

How can energy balance be achieved by free-living human subjects? *John M. de Castro* 1–14
Control of energy balance by a wild ungulate, the kudu (*Tragelaphus strepsiceros*) through adaptive foraging behaviour. *Norman Owen-Smith* 15–24
Human pattern of food intake and fuel-partitioning during weight recovery after starvation: a theory of autoregulation of body composition. *A. G. Dulloo* 25–40
An energy sensor for control of energy intake. *Mark I. Friedman* 41–50

Nutrition and poverty in industrialized countries *(Symposium Proceedings: 24–28 June 1996)*

Chair: C. J. K. Henry, *Oxford Brookes University*

Nutrition and poverty in Europe: an overview. *E. A. Dowler & B. M. Dobson* 51–62
Hunger, food security and welfare policies: issues and debates in First World societies. *Graham Riches* 63–74
Socio-economic differentials in health: the role of nutrition. *George Davey Smith & Eric Brunner* 75–90
Developments in the UK: work of the Low Income Project Team. *Michael Nelson* 91–100
Nutrition and poverty in industrialized countries: report of roundtable discussion. *J. L. Buttriss* 101–103

The weaning process *(Symposium Proceedings: 24–28 June 1996)*

Chair: J. Morgan, *University of Surrey*

Weaning in Britain: practice, policy and problems. *Brian A. Wharton* 105–119
Ethnic influences on weaning diet in the UK. *John James & Anita Underwood* 121–130
Weaning and dental health. *R. D. Holt* 131–138
Complementary feeding in developing countries: factors affecting energy intake. *Kenneth H. Brown* 139–148

Meeting the needs of lactation *(Symposium Proceedings: 24–28 June 1996)*

Chair: M. A. Lomax, *University of Aberdeen*

Adipose tissue metabolism during lactation: where do we go from here? *John P. McNamara* 149–167
Protein metabolism during lactation. *Neil S. Jessop* 169–175
Mammary-tissue amino acid transport systems. *D. B. Shennan, I. D. Millar & D. T. Calvert* 177–191

International Committee of the Nutrition Society (ICONS) meeting report *(Symposium Proceedings: 24–28 June 1996)*
Information and support for overseas members. *Sue New & Ann Burgess* 193

Nutrition Society Medal Lecture *(Symposium Proceedings: 24–28 June 1996)*
Energy expendiiure, body composition, and disease risk in children and adolescents. *Michael I. Goran* 195–209

Plenary Invited Lecture *(Symposium Proceedings: 24–28 June 1996)*
Diet, politics and disaster: The Great Irish Famine. *Joseph McPartlin* 211–223

Diabetes towards the year 2000 *(Symposium Proceedings: 24–28 June 1996)*

Chair: P. R. Flatt, *University of Ulster at Coleraine*

Nutrition and environmental factors in insulin-dependent diabetes mellitus: a genetic–epidemiological perspective. *Anders Green* 225–231
Early and late nutritional windows for diabetes susceptibility. *Clive J. Petry, Mina Desai, Susan E. Ozanne & C. Nicholas Hales* 233–242
Pancreatic B-cell dysfunction and glucose toxicity in non-insulin-dependent diabetes. *Peter R. Flatt, Yasser H. A. Abdel-Wahab, Alison C. Boyd, Christopher R. Barnett & Finbarr P. M. O'Harte* 243–262
Dietary and lifestyle factors contributing to insulin resistance. *Patrick M. Bell* 263–272
Lipids, thrombosis and cardiovascular disease in diabetes. *John S. Yudkin* 273–280
Strategies for maintaining good glycaemic control without recurrent hypoglycaemia. *I. A. Macdonald* 281–290

Nutritional issues for women *(Symposium Proceedings: 24–28 June 1996)*

Chair: M. B. E. Livingstone, *University of Ulster at Coleraine*

Folate requirements for health in women. *Helene McNulty* 291–303
Fear of fatness and adolescent girls: implications for obesity prevention. *Mary A. T. Flynn* 305–317
Reproduction: a global nutritional challenge. *Gail R. Goldberg* 319–333
Women and nurture in industrial societies. *Penny Van Esterik* 335–343
Nutritional issues for women in developing countries. *Susan P. Walker* 345–356
Is nutrition important in osteoporosis? *Ann Prentice* 357–367
Controversies surrounding diet and breast cancer. *Lenore Kohlmeier & Michelle Mendez* 369–382
Cardiovascular risk factors in women. *Christine M. Williams* 383–391

Assessment of nutritional status in disease and other trauma *(Symposium Proceedings: 24–28 June 1996)*

Chair: H. J. Powers, *University of Sheffield*

Disease and malnutrition in British hospitals. *C. R. Pennington* 393–407
Influence of disease on iron status. *Mark Worwood* 409–419
Impact of disease on markers of micronutrient status. *David I. Thurnham* 421–431
Impact of disease on markers of macronutrient status. *A. Shenkin* 433–441
The value of peri-operative nutrition in the sick patient. *Steven D. Heys, Leslie G. Walker & Oleg Eremin* 443–457
Vitamin A and human immunodeficiency virus infection. *Richard D. Semba* 459–469
Novel lipid sources in parenteral and enteral nutrition. *Bruce R. Bistrian* 471–477

Postgraduate Symposium *(Symposium Proceedings: 24–28 June 1996)*

Chair: N. M. Binns, *Coca Cola International, London*

The effects of oral vitamin supplementation on cardiovascular risk factors. *J. V. Woodside, I. S. Young, J. W. G. Yarnell, D. McMaster & A. E. Evans* 479–488
The influence of dietary fat on postprandial lipaemia and factor VII coagulant activity in human subjects. *N. Yahia & T. A. B. Sanders* 489–496
Apolipoprotein B-48 as a marker for chylomicrons and their remnants: studies in the postprandial state. *S. Gail Isherwood, Christine M. Williams & Barry J. Gould* 497–505
Nature's own pharmacy: the diabetes perspective. *Alison M. Gray & Peter R. Flatt* 507–517
Meat avoidance and body weight concerns: nutritional implications for teenage girls. *Yvonne M. Ryan* 519–524

Regulation of nitrogen metabolism in farm animals *(Symposium Proceedings: 4–5 September 1996)*

Chairs: D. S. Parker, *University of Newcastle*; **P. J. Buttery,** *University of Nottingham*; **M. A. Lomax,** *University of Aberdeen*; **J. C. MacRae,** *Rowett, Aberdeen*; **G. E. Lobley,** *Rowett, Aberdeen*

Limits and limitations to nitrogen use in farm animals. *John D. Oldham, Gerry C. Emmans & Ilias Kyriazakis* 525–534
Nitrogen metabolism in gastrointestinal tissue of the pig. *J. Van Der Meulen & A. J. M. Jansman* 535–545
Regulation of hepatic nitrogen metabolism in ruminants. *G. E. Lobley & G. D. Milano* 547–563
Nutrient–hormone signals regulating muscle protein turnover in pigs. *Bernard Sève & Andrew A. Ponter* 565–580
Nutritional control of amino acid supply to the mammary gland during lactation in the pig. *Nathalie L. Trottier* 581–591
Amino acid supply and metabolism by the ruminant mammary gland. *Brian J. Bequette & F. R. Colette Backwell* 593–605
Molecular mechanisms involved in the nutritional and hormonal regulation of growth in pigs. *John M. Brameld* 607–619
Immunological manipulation of growth. *J. M. Pell* 621–630
Modelling post-absorptive protein and amino acid metabolism in the ruminant. *Mark D. Hanigan, Jan Dijkstra, Walter J. J. Gerrits & James France* 631–643
Mathematical modelling of nitrogen flow in growing pigs and lactating sows. *James E. Pettigrew* 645–656

Postprandial lipid metabolism *(Symposium Proceedings: 15–16 October 1996)*

Chairs: D. J. Betteridge, *Middlesex Hospital*; **C. M. Williams,** *University of Reading*; **M. I. Gurr,** *University of Reading*; **M. A. Austin,** *University of Washington, Seattle*

Postprandial lipid metabolism: an overview. *Richard J. Havel* 659–666
Triacylglycerol and coronary heart disease. *Melissa A. Austin* 667–670
Postprandial lipid metabolism in relation to coronary heart disease. *Fredrik Karpe* 671–678
Postprandial lipid metabolism: effects of dietary fatty acids. *Christine M. Williams* 679–692
Low-density lipoprotein subclasses: mechanisms of formation and modulation. *Bruce A. Griffin* 693–702
The acylation-stimulating protein pathway and regulation of postprandial metabolism. *Allan D. Sniderman, Katherine Cianflone, Lucinda Summers, Barbara Fielding & Keith Frayn* 703–712

CONTENTS

Regulation of the plasma non-esterified fatty acid concentration in the postprandial state. *Keith N. Frayn, Lucinda K. M. Summers & Barbara A. Fielding* 713–721
Lipoprotein lipase: regulation and role in lipoprotein metabolism. *T. Olivecrona, M. Hultin, M. Bergö & G. Olivecrona* 723–729
Lipoprotein lipase (*EC* 3.1.1.34) targeting of lipoproteins to receptors. *Ulrike Beisiegel & Jörg Heeren* 731–737
Postprandial lipid metabolism and thrombosis. *G. J. Miller* 739–744
Effects of drugs on postprandial lipoprotein metabolism. *C. J. Packard* 745–751
Insulin action and non-esterified fatty acids. *E. Ferrannini, S. Camastra, S. W. Coppack, D. Fliser, A. Golay & A. Mitrakou* 753–761

Sir David Cuthbertson Medal Lecture (*Symposium Proceedings: 3–5 December 1996*)

Chair: M. Elia, *Dunn, Cambridge*

Energy metabolism in cancer and human immunodeficiency virus infection. *Susan A. Jebb* 763–775

New perspectives in the anorexia–cachexia syndrome *(Symposium Proceedings: 3–5 December 1996)*

Chair: M. J. Rennie, *University of Dundee*

Isolation of a novel cancer cachectic factor. *Michael J. Tisdale* 777–783
Wasting illness as a disorder of body weight regulation. *Michael W. Schwartz, Randy J. Seeley & Stephen C. Woods* 785–791
Measurement of muscle proteolysis and the impact on muscle wasting. *Steven Nissen* 793–799
Liver protein and glutamine metabolism during cachexia. *Karel W. E. Hulsewé, Nicolaas E. P. Deutz, Ivo de Blaauw, Rene R. W. J. van der Hulst, Maarten M. F. von Meyenfeldt & Peter B. Soeters* 801–806

Food industry, nutrition and public health *(Symposium Proceedings: 19 February 1997)*

Chair: M. J. Gibney, *Trinity College, Dublin*

The addition of nutrients to foods. *David P. Richardson* 807–825
Fat and sugar substitutes: implications for dietary intakes and energy balance. *David J. Mela* 827–840
Nutritional functionality of foods. *Paulus M. Verschuren* 841–843
Food biotechnology: food industry, nutrition and public health. *Milly Ryan-Harshman* 845–854
New food processing technologies: from foraging to farming to food technology. *C. J. K. Henry* 855–863
Regulatory aspects of new technologies. *John G. Wood & Lynn M. Insall* 865–877
Consumers' views on nutrition and public health. *Kees De Winter & Gabriela Rodriguez* 879–888

Nutrition and diabetes *(Symposium Proceedings: 27 February 1997)*

Chair: N. P. Kennedy, *Trinity College, Dublin*

Food, obesity and non-insulin-dependent diabetes: are there molecular links? *Johannes B. Prins* 889–898
Are the nutritional guidelines for diabetics achievable? *Margaret M. Humphreys* 899–902

CONTENTS

Nutritional aspects of bone *(Symposium Proceedings: 7–8 April 1997)*

Chairs: C. Bolton-Smith, *Ninewells Hospital, Dundee;* **C. Edwards,** *Yorkhill Hospitals, Glasgow*

Markers of bone turnover in relation to bone health. *Simon P. Robins & Susan A. New* 903–914
The roles of vitamins D and K in bone health and osteoporosis prevention. *M. J. Shearer* 915–937
An epidemiological model of privational rickets and osteomalacia. *Matthew G. Dunnigan & Janet B. Henderson* 939–956
Dyschondroplasia in poultry. *Colin C. Whitehead* 957–966
Bone density and physical activity. *Olga M. Rutherford* 967–975
Nutritional influences on bone mass. *David M. Reid & Susan A. New* 977–987

Nutrition of wild and captive wild animals *(Symposium Proceedings: 16–18 May 1997)*

Chairs: R. J. Young, *Edinburgh Zoo;* **C. J. Seal,** *University of Newcastle;* **I. Kyriazakis,** *Scottish Agricultural College, Edinburgh;* **E. S. Dierenfeld,** *Bronx Zoo, New York*

Plenary lecture: Captive wild animal nutrition: a historical perspective. *Ellen S. Dierenfeld* 989–999
From babirusa (*Babyrousa babyrussa*) to domestic pig: the nutrition of swine. *Kristin Leus & Alastair A. Macdonald* 1001–1012
Fatty acid metabolism in domestic cats (*Felis catus*) and cheetahs (*Acinonyx jubatas*). *J. E. Bauer* 1013–1024
Energy expenditure in wild birds. *David M. Bryant* 1025–1039
Physiological adaption in savanna ungulates. *A. W. Illius* 1041–1048
Gastrointestinal physiology and nutrition in wild birds. *Gary E. Duke* 1049–1056
Nutritional constraints on egg production in birds. *David C. Houston* 1057–1065
Stable isotopes in adipose tissue fatty acids as indicators of diet in arctic foxes. *Caroline M. Pond & Iain Gilmour* 1067–1081
Utilizing wild foraging ecology information to provide captive primates with an appropriate diet. *Susan D. Crissey & Linda S. Pribyl* 1083–1094
The importance of food presentation for animal welfare and conservation. *Robert J. Young* 1095–1104
The importance of calcium in relation to phosphorus, especially in folivorous reptiles. *Fredric F. Frye* 1105–1117
Factors influencing the daily energy expenditure of small mammals. *John Speakman* 1119–1136
Grouse and ptarmigan nutrition in the wild and in captivity. *Robert Moss* 1137–1145

ABSTRACTS OF COMMUNICATIONS

24–28 June 1996

Influence of maternal nutrition during early pregnancy on placental development in sheep. *Lindsay Heasman, Lynne Clarke, Monique Hudson & Michael E. Symonds* 2A
Lean body mass and human pregnancy. *Choy H. Lee & Paul G. Whittaker* 3A
Whole body protein turnover during pregnancy in healthy English women. *S. Duggleby & A. A. Jackson* 4A
The relationship between calcium intakes in early pregnancy and iron status. *S. Robinson, K. Godfrey, C. Osmond & V. Cox* 5A
Does maternal calcium intake influence the calcium nutrition of the breast-fed baby? *M. Ann Laskey, Landing Jarjou, Bakary Dibba & Ann Prentice* 6A

CONTENTS

Bile-salt-stimulated lipase in preterm and term human milk. *A. M. McKillop, M. M. T. O'Hare & J. A. Dodge* 7A

A comparison of two infant soyabean formulas containing different protein preparations. *Fiona Clarke, Valda Bunker & Angela Hounslow* 8A

Relation of infant diet to childhood health and growth: The Dundee Infant Feeding Study. *A. C. Wilson, J. S. Forsyth, S. A. Greene, C. Hau & P. W. Howie* 9A

Do early changes in dietary fatty acid composition alter lipoprotein metabolism in adulthood in the rat? *C. Chapman, L. M. Morgan & M. C. Murphy* 10A

The response of blood pressure to feeding composite diets of differing macronutrient composition in rats with hypertension of fetal origin. *C. L. Pickard & H. D. McCarthy* 11A

Haemoglobin as a predictor of birth weight in women of North West Frontier Province, Pakistan. *B. Akram, P. I. Paracha, J. Khalil, L. Rukh & B. Afridi* 12A

A comparison of urine-bags and super-absorbent nappies for collection of urine to measure intestinal permeability. *F. S. W. McCullough, C. A. Northrop-Clewes & D. I. Thurnham* 13A

Growth rates of infants in the Upper Nuimi District of The Gambia, West Africa. *A. E. Cathcart, C. A. Northrop-Clewes, E. M. E. Poskitt & D. I. Thurnham* 14A

The accuracy of data describing the onset of weaning in South Africa's Birth to Ten study. *George T. H. Ellison, Lucy Wagstaff & Thea De Wet* 15A

The nutritional status and weaning foods of infants and young children in Central Uganda. *Joyce K. Kikafunda, Ann F. Walker, Richard B. Kajura & Richard Basalirwa* 16A

Effect of zinc supplementation on growth of school children in Uganda. *Joyce K. Kikafunda, Ann F. Walker, Richard B. Kajura & James K. Tumwine* 17A

Effect of zinc supplementation on growth and morbidity of undernourished Jamaican children. *J. Meeks Gardner, M. Witter & D. Ramdath* 18A

Zinc intake from non-breastmilk sources in the first year of life in a poor urban slum in Manaus, Amazonas, Brazil. *Roger Shrimpton* 19A

The role of oxidative stress and DNA damage in the aetiology of malnutrition-related diabetes mellitus. *Margaret P. McDonagh, Liaquat Ali, Azad Kahn, Peter R. Flatt, Yvonne A. Barnett & Christopher R. Barnett* 20A

Effect of acute toxic epithelial damage on vitamin A metabolism in South African children. *Juana F. Willumsen, Karin Simmank, Suzanne M. Filteau, Lucy Wagstaff & Andrew M. Tomkins* 21A

Crop production and its influence on economic status and the nutritional status of children in Malawi. *M.O. Mpoma, B. M. Margetts & A. A. Jackson* 22A

Seasonal differences in the intake of imported milled rice in the village of Chilla in The Gambia, West Africa. *A. E. Cathcart, E. M. E. Poskitt, M. B. E. Livingstone & D. I. Thurnham* 23A

Nutritional intakes of a rural and an urban population sample in South Central Cameroon, West Africa. *S. Sharma, S. Chungong, J. C. Mbanya, J. Cade & J. K. Cruickshank* 24A

Nutritional status of tribal women of Orissa. *Basanti Rath* 25A

Assessing malnutrition through anthropometry among free-living elderly in a rural site of Malaysia. *Suzana Shahar, Jane Earland, Anthony M. Warnes & Suriah A. Rahman* 26A

Macronutrient sources in the South Asian diet. *N. A. Karim & B. M. Margetts* 27A

Foods consumed by a Bengali population in a British hospital. *P. C. McGlone, G. J. Davies, A. Murcott, J. Powell-Tuck & J. W. T. Dickerson* 28A

Trends in birth outcomes of Asian babies in Southampton. *S. Mohd-Yusof, B. M. Margetts, N. Karim, Z. S. M. Al-Dallal & A. A. Jackson* 29A

Comparing the dietary iron intakes during weekdays and weekends among South Asian adolescent girls in Southampton by using a 24 h dietary recall. *Zuhair Salman Majed Al-Dallal & Barrie M. Margetts* 30A

Composition of the diet of a population sample of African Caribbeans living in Manchester; a comparison with a white population. *S. Sharma, J. Cade & J. K. Cruickshank* 31A

CONTENTS

Variation in food beliefs and dietary practices by ethnic group in pregnant women in Birmingham. *Fatemeh Rabiee* 32A

Do the intergenerational differences in the diets of first and second generation Pakistani Muslims affect the diets of their children? *J. H. Godson, S. Parsons & S. A. Williams* 33A

Improving the acceptability of potassium chloride as a salt substitute, using coconut milk powder. *M. Imhof, C. J. K. Henry & D. J. Mela* 34A

The effect of seasonal variation and light cycle changes on selected factors associated with heart disease. *Jennifer C. Freeburn & William S. Gilmore* 35A

Chronic effect of varying the proportions of sucrose and starch in the diet on insulin sensitivity in healthy adults. *C. Vale, M. Daly, A. Littlefield, M. Walker, K. G. M. M. Alberti & J. C. Mathers* 36A

Do people with impaired glucose tolerance on two occasions have higher levels of cardiovascular risk factors than those with impaired glucose tolerance once only? *J. Oldroyd, N. Unwin, M. White & J. C. Mathers* 37A

Post prandial insulin sensitivity of glucose disposal measured with [6,6^{2}H]-D-glucose is markedly dependent on prior meal consumption. *G. Livesey, R. Faulks, P. Wilson, J. Brown, M. Roe, T. Newman, K. Taylor, S. Hampton & R. Greenwood* 38A

Development of a dual stable-isotope method for determining glucose absorption from ^{13}C-enriched starchy foods. *G. Livesey, R. Faulks, P. Wilson, M. Roe, J. Brown, T. Newman, F. Mellon, J. Eagles, J. Dennis, I. Parker, R. Greenwood & D. Halliday* 39A

Individual rates of glucose absorption from ^{13}C-enriched starch in peas eaten by healthy adults can be very different: Is there a role in the aetiology of disease? *G. Livesey, R. Faulks, P. Wilson, M. Roe, J. Brown, T. Newman, F. Mellon, J. Dennis, I. Parker, R. Greenwood & D. Halliday* 40A

Evidence that complement is involved in the mechanism of IDDM serum induced β-cell cytotoxicity and that provision of glutamine can be cytoprotective. *E. M. Caraher & P. Newsholme* 41A

Effects of glycated and non-glycated gastric inhibitory polypeptide on glucose transport and metabolism in isolated abdominal muscle from mice. *F. P. M. O'Harte, A. M. Gray, Y. H. A. Abdel-Wahab & Peter R. Flatt* 42A

Mono- and di-glycated insulin exhibits reduced cellular glucose uptake and glucose lowering activity in mice. *A. C. Boyd, F. P. M. O'Harte, A. M. Gray, Y. H. A. Abdel-Wahab, H. McNulty, C. R. Barnett & P. R. Flatt* 43A

Molecular mechanisms of hexose recognition in insulin-secreting pancreatic BRIN-BD11 cells. *Neville H. McClenaghan, Christopher R. Barnett & Peter R. Flatt* 44A

Evaluation of the antidiabetic effects of coriander (*Coriandrum sativum*). *Alison M. Gray & Peter R. Flatt* 45A

Vitamin C supplementation ameliorates aspects of the diabetic syndrome in obese hyperglycaemic (ob/ob) mice. *Yasser H. A. Abdel-Wahab, Finbarr P. M. O'Harte, Christopher R. Barnett & Peter R. Flatt* 46A

Effect of vitamin C supplementation on metabolic variables and hepatic cytochrome P450 mixed-function oxidase activity in streptozotocin-diabetic rats. *Jacqueline Clarke, Jacquie Snelling, Costas Ioannides, Peter R. Flatt & Christopher R. Barnett* 47A

Weight perceptions and weight loss practices of Irish teenage girls. *Y. M. Ryan, M. J. Gibney, H. Johnson & M. A. T. Flynn* 48A

Meat avoidance, weight perceptions and nutrient intakes of Irish teenage girls. *Y. M. Ryan, M. J. Gibney, H. Johnson & M. A. T. Flynn* 49A

Meat avoidance and dietary calcium intakes of Irish teenage girls. *Y. M. Ryan, M. O'Donoghue, M. Cantwell, H. Johnson & M. A. T. Flynn* 50A

Food choices of primary-school children: initial observations. *Anita Eves, Michael Corney, Michael Kipps, Carol Noble & Margaret Lumbers* 51A

Leeds High Fat Study: Behavioural characterization of high and low fat consumers. *Jennie I. Macdiarmid, Vikki Hamilton, Janet E. Cade & John E. Blundell* 52A

CONTENTS

Honest but invalid: consumer views on recording their food intake. *David J. Mela & Jacqueline I. Aaron* 53A

Adverse alterations in mood after changing to a low fat diet. *A. S. Wells, N. W. Read, J. D. E. Laugharne & N. S. Ahluwalia* 54A

An investigation of the beliefs, attitudes and practices of dietitians in relation to the use of antioxidant vitamins in the treatment of coronary heart disease (CHD) and cancer. *Diane F. Smith & Terry Kirk* 55A

Applying stages of change and motivational interviewing to dietary counselling. *C. Ni Mhurchu & B. M. Margetts* 56A

Effect of nutrition education on the attitudes of caterers towards the provision of healthy meals. *Anita Eves, Michael Corney, Michael Kipps & Carol Noble* 57A

The teaching of nutrition in catering-related courses in England and Wales. *Anita Eves, Michael Corney, Michael Kipps & Carol Noble* 58A

Healthier eating: income, difficulty and food intake. *Richard Shepherd, Claire M. Paisley, Susan Eley, Paul Sparks, Annie S. Anderson & Mike E. J. Lean* 59A

Dietary education of free-living volunteers participating in a 4-month dietary intervention study. *J. M. F. Knapper, D. H. Webb, C. N. Brooks, J. A. Tredger, L. M. Morgan, J. Wright & C. M. Williams* 60A

Stages of change towards healthy eating among Irish and UK adults. *M. Kearney, B. Margetts, M. J. Gibney & J. Kearney* 61A

Consumer strategies for increasing fruit and vegetable consumption in the UK. *David N. Cox, Annie S. Anderson, Joanna Reynolds, Susan McKellar, David J. Mela & Michael E. J. Lean* 62A

Smoking status and knowledge, attitudes and behaviour in relation to fruit and vegetable consumption. *R. L. Thompson, B. M. Margetts, V. Speller & D. McVey* 63A

The UK Women's Cohort Study: background and obtaining local ethical approval. *Amanda Woodhouse, Claire Calvert & Janet Cade* 64A

Dietary changes: association with lifestyle, socio-demographic circumstances and health variables. *A. Toby Prevost, Margaret J. Whichelow & Brian D. Cox* 65A

Trends in energy intake and body mass index across smoking-habit groups for men. *C. Bolton-Smith & Mark Woodward* 66A

Influence of preceding physical activity on the metabolic partitioning of an oral glucose load using naturally enriched [^{13}C]glucose. *S. A. Wootton, N. Lodge, S. Marsh & J. L. Murphy* 67A

The effect of intense physical activity on profiles of hunger and energy intake in free-living individuals. *Neil A. King, Claire L. Watson, R. James Stubbs & John E. Blundell* 68A

Effect of caffeine on muscle tremor and exercise performance in healthy men. *L. J. Archibald, M. Berovic, N. McCathie, A. Rees, P. L. Greenhaff & I. A. Macdonald* 69A

The effect of creatine supplementation upon dynamic short-term maximal exercise. *Eugene Moriarty, Bernard Donne & Fred Andrews* 70A

Studies on a monoclonal antibody recognizing gluten-derived peptides implicated in coeliac disease. *R. D. Husain, G. M. Brett, E. N. C. Mills, I. J. Colquhoun & M. R. A. Morgan* 71A

Breastfeeding and later introduction of gluten: their effect on the immune response to wheat protein. *V. E. Freeman, H. M. V. Hoey, C. O'Farrelly & M. J. Gibney* 72A

Cardiovascular and metabolic response to nasogastric and oral feeding in young healthy volunteers. *T. A. Stubbs & I. A. Macdonald* 73A

Benefit of magnesium supplementation (200 mg/d) in relief of the symptoms of the premenstrual syndrome. *Ann F. Walker, Miriam Coelho de Souza & Michael F. Vickers* 74A

CONTENTS

A synergistic effect of magnesium and vitamin B_6 supplementation for the relief of symptoms of the premenstrual syndrome (PMS). *Miriam Coelho de Souza, Ann F. Walker, Kim M. Bolland & Paul A. Robinson* 75A

Feeding and behavioural thermoregulation in obese mice. *Petrina S. Symes, Siobhan McBennett & J. F. Andrews* 76A

The pattern of tissue mobilization and storage in the growing rat. *C. J. K. Henry, P. R. Payne & A. Ghusain-Choueiri* 77A

A novel method using high-performance liquid chromatography to isolate lysine in amounts suitable for isotope-ratio mass-spectrometry. *R. Bundy & A. A. Jackson* 78A

Transfer of ^{15}N from urea to the circulating dispensable and indispensable amino acid pool in the human infant. *N. Gibson, E. Ah-Sing, A. Badalloo, T. Forrester, A. Jackson & D. J. Millward* 79A

Postprandial protein utilization of wheat protein from a single meal in normal adults. *A. Fereday, N. Gibson, M. Cox, D. Halliday, P. J. Pacy & D. J. Millward* 80A

The effects of creatine and carbohydrate ingestion on whole-body creatine retention in vegetarians. *A. L. Green, I. A. Macdonald & P. L. Greenhaff* 81A

The effect of dietary glycerol on the rate of postprandial glycogen synthesis in cachectic tumour-bearing rats. *A. A.-W. Alhamdan, O. A. Obeid & P. W. Emery* 82A

The effect of meal size on the rates of postprandial glycogen and lipid synthesis of tumour-bearing rats. *O. A. Obeid, J. A. Khayatt & P. W. Emery* 83A

Plasma metabolite, hormone and lipoprotein lipase activity responses to foods enriched with *n*-3 polyunsaturated fatty acids. *C. N. Brooks, J. A. Lovegrove, M. C. Murphy, B. J. Gould & C. M. Williams* 84A

Apolipoprotein B-48 measurements as a marker for chylomicron metabolism and the effect of chronic *n*-3 PUFA intake. *J. A. Lovegrove, C. N. Brooks, M. C. Murphy, B. J. Gould & C. M. Williams* 85A

Detection of orally administered [1-^{13}C]palmitic acid in the triaclyglycerol component of chylomicrons by gas chromatography–isotope ratio mass spectrometry. *M. Stolinski, M. A. Humayun, A. Hounslow, A. E. Jones, J. L. Murphy, S. A. Wootton & R. Pratley* 86A

Gastrointestinal handling and metabolic disposal of emulsified [^{13}C]-tripalmitin in healthy children, healthy women and patients with cystic fibrosis. *J. L. Murphy, K. Laiho, A. Hounslow & S. A. Wootton* 87A

The influence of a high-oleic-acid test meal compared with butter fat on postprandial lipaemia and factor VII coagulant activity in young men. *Francesca Oakley, T. A. B. Sanders & G. J. Miller* 88A

Postprandial coagulation factor VII activity in northern and southern Europeans. *Helen M. Roche, Antonis Zampelas, Maria Kapsokefalou, Antony Kafatos, Christine M. Williams & Michael J. Gibney* 89A

The role of growth hormone in regulation of lipolysis in normal subjects after an overnight fast. *J. S. Samra, M. L. Clark, S. M. Humphreys, K. N. Frayn & I. A. Macdonald* 90A

Suppression of endogenous lipolysis during exogenous triacylglycerol influsion. *Jaswinder S. Samra, Sarah L. Giles, Cate L. Ravell, Mo L. Clark, Sandy M. Humphreys & Keith N. Frayn* 91A

Adverse effect of 18 : 1*trans v.* 18 : 1*cis* on plasma HDL-cholesterol subfractions in men. *T. A. B. Sanders, Francesca Oakley, G. J. Miller & D. Crook* 92A

Effects of meals of varying monounsaturated fatty acid content on postprandial hormones and lipaemia in young and middle-aged men. *J. M. E. Knapper, D. H. Webb, A. Zampelas, K. Jackson, J. A. Tredger, L. M. Morgan, J. Wright & C. M. Williams* 93A

Postheparin lipase activities and postprandial triacylglycerol responses to meals of varying monounsaturated fatty acid content in young men from the UK and Greece. *K. G. Jackson, A. Zampelas, J. M. E. Knapper, J. Wilson, A. Kafatos, M. Kapsokefalou, C. M. Williams & B. J. Gould* 94A

CONTENTS

The effect of body mass index on postprandial non-esterified fatty acid suppression. *Lucinda K. M. Summers, Barbara A. Fielding, Vera Ilic & Keith N. Frayn* 95A

Very early changes in gastrointestinal morphology in response to riboflavin depletion. *Catherine A. Yates, Gareth S. Evans & Hilary J. Powers* 96A

An investigation of the role of dietary copper and α-tocopherol on the oxidative stability of poultry muscle. *L. M. O'Neill, K. Galvin, P. A. Morrissey & D. J. Buckley* 97A

Effects of vitamin A on inflammatory responses of Caco2 colonic epithelial cells. *S. M. Filteau, D. House & J. G. Raynes* 98A

The effect of menopause on lipoprotein-associated biomarkers. *L. M. Edmond & D. I. Thurnham* 99A

Effect of oral supplementation with vitamin E on carotene levels in different lipoprotein fractions in humans. *M. Chopra, U. McLoone, M. O'Neill & D. I. Thurnham* 100A

Quantitation of vitamin E and a carotenoid in human lens nuclei, and a preliminary study of micronutrient supplementation. *Andrew MacDonald, Su-Jing Chen, Christopher Bates & Roger Holden* 101A

Absorption of carotenoids. *M. E. O'Neill & D. I. Thurnham* 102A

Relationships between dietary intakes and plasma concentrations of carotenoids. *T. K. Ha, L. Maher, A. S. Anderson & M. E. J. Lean* 103A

Comparison of the antioxidant activities of lycopene, lutein and crocetin at atmospheric and low oxygen partial pressures in an *in vitro* model system. *A. E. Duggan, E. P. Prendergast & N. M. O'Brien* 104A

Supplementation of the diet with β-carotene or lycopene: comparison of effects on DNA damage in primary T-lymphocytes as assessed using the 'Comet' assay. *Siân B. Astley, David A. Hughes, Anthony J. A. Wright, Abigael C. J. Peerless & Susan Southon* 105A

Protection from various flavonoids against oxygen-radical-generated DNA damage in the single-cell gel electrophoresis assay. *M. Noroozi, W. J. Angerson, A. Collins & M. E. J. Lean* 106A

A longitudinal study of vitamin intake and plasma levels in the premature infant. *K. M. Silvers, A. T. Gibson & H. J. Powers* 107A

Neonatal neutrophil vitamin C concentration, effect on function and viability. *A. Loban, N. Rebuck, S. C. Yong, A. T. Gibson, A. Finn & H. J. Powers* 108A

The radioprotective effect of dietary antioxidants on murine haematopoietic cells. *E. S. Galligan, S. F. Sweetman, S. R. McKeown & J. J. Strain* 109A

Influence of antioxidant vitamin supplementation on cellular DNA damage and repair in Raji human lymphoblastoid cells. *Sandra F. Sweetman, Valerie J. McKelvey-Martin & J. J. Strain* 110A

Ferric reducing ability of plasma (FRAP) as a novel method for measuring 'total antioxidant power'. *Iris F. F. Benzie & J. J. Strain* 111A

High-performance liquid chromatographic (HPLC) determination of aldehydes in low-density lipoprotein. *Angela L. Bailey, G. Wortley & Susan Southon* 112A

The effect of cholesterol oxidation products on the cholesterol content of intracellular membranes of primary cultures and finite cell lines. *A. M. Wilson, R. M. Sisk & N. M. O'Brien* 113A

A comparison of the cytotoxicities and the extent of lipid peroxidation of cholesterol oxidation products in *in vitro* model systems. *R. M. Sisk, A. M. Wilson, S. A. Aherne & N. M. O'Brien* 114A

Lipid peroxidation and caeruloplasmin activity in cord blood. *M. E. Kiely & P. A. Morrissey* 115A

New vitamin D values for meat and their implication for vitamin D intake in British adults. *Sigrid A. Gibson & Margaret Ashwell* 116A

Food frequency questionnaire (FFQ) interpretation and analysis: issues from the UK Women's Cohort Study. *Claire Calvert, Janet Cade, Amanda Woodhouse, Jennifer Barrett & UKWCS Steering Group* 117A

CONTENTS

Assessment of dietary nutrient consumption in alcoholic patients using a food assessment questionnaire. *Claire Ford, Christopher J. Seal, Helen Milburn, Christopher P. Day, Michael Nelson & John C. Mathers* 118A

Patterns of reported energy intakes and weight loss between repeated measurement periods during a slimming study in overweight subjects with ischaemic heart disease. *C. R. Hankey & M. E. J. Lean* 119A

Validation of a 7 d food and drink diary: a tool for the assessment of nutrient intake. *Moira A. Geekie, Monique M. Raats, Paul Sparks & Richard Shepherd* 120A

Under-reporting of energy intake at all levels of energy expenditure: evidence from doubly labelled water studies. *Alison E. Black* 121A

Energy intake : basal metabolic rate (EI : BMR) for the evaluation of reported energy intake of individuals. *Alison E. Black, Gunnar Johansson, Ailsa Welch & Sheila A. Bingham* 122A

Double validation of dietary intakes against 24 h urinary nitrogen and energy expenditure by doubly-labelled water in men and women. *Alison E. Black, Ailsa Welch, Gunnar Johansson & Sheila A. Bingham* 123A

The feasibility of measuring energy expenditure by heart rate monitoring in a population-based study of adults. *Nicholas J. Wareham, Susie H. J. Hennings, Nicholas E. Day & Andrew M. Prentice* 124A

A new multicompartment body composition model to estimate fat, skeletal muscle and visceral cell mass from measurements of total body water and extracellular fluid. *Tom Preston* 125A

Waist circumference : height ratio is a strong predictor of intra-abdominal fat as measured by computed tomography. *M. A. Ashwell, T. J. Cole & A. K. Dixon* 126A

Covert manipulation of the energy density of mixed diets: effect on *ad libitum* food intake in 'free-living' humans. *L. M. O'Reilly, R. J. Stubbs, A. M. Johnstone, O. M. Mara & K. A. Robertson* 127A

The effect of monoacylglycerols and triacylglycerols on appetite and day-to-day food intake in humans. *A. M. Johnstone, R. J. Stubbs, N. Murphy & K. A. Robertson* 128A

Breakfasts high in mono- or triacylglycerol: no differential effect on within-day appetite and energy intake. *L. M. Ryan, R. J. Stubbs, A. M. Johnstone, H. E. Lyons & K. A. Robertson* 129A

Effects of substitution of medium-chain triacylglycerol for long-chain triacylglycerol on energy balance in obese women on a weight-reducing diet. *L. M. Martin, M. B. E. Livingstone, H. McNulty & R. J. Stubbs* 130A

The effect of dietetic advice on incorporating altering meal frequency for hyperlipidaemic patients on low-fat diets. *S. M. King & M. J. Gibney* 131A

Dietary fat reduction achieved by increasing consumption of a starch-rich food: a 12-week follow-up. *T. R. Kirk, S. Burkill, M. Cursiter & J. Landman* 132A

The effect of covertly manipulating the energy density of high-carbohydrate diets on *ad libitum* food intake in 'pseudo free-living' humans. *R. J. Stubbs, C. G. Harbron & A. M. Johnstone* 133A

Refined versus non-milk extrinsic sugar: is there a different relationship to antioxidant vitamin adequacy? *C. Bolton-Smith* 134A

Micronutrient intakes by pre-school children in Britain: association with consumption of non-milk extrinsic sugars. *Sigrid A. Gibson* 135A

Bowel habit: the perceived influence of diet and lifestyle. *Sarah W. Mian & G. Jill Davies* 136A

The effect of meat and milk proteins on *in vitro* dialysability of iron. *B. Mulvihill & P. A. Morrissey* 137A

Growth hormone and calcium absorption in aged female rats. *K. Cashman & J. C. Fleet* 138A

The effect of sugar alcohols on calcium absorption in the rat. *T. Bennett, D. Buckley, A. Flynn & K. Cashman* 139A

Excretion of urinary pyridinium crosslinks in the rat: day-to-day variations and variations due to age and sex differences. *A. Creedon, K. Cashman & A. Flynn* 140A

CONTENTS

Effect of calcium supplementation on biochemical markers of bone formation and bone resorption in healthy young adults. *F. Ginty, K. Cashman & A. Flynn* 141A
Relationship between present and past dietary intake and bone mass using broadband ultrasound attenuation. *Susan A. New, Alison Stewart, David A. Grubb & David M. Reid* 142A
Little evidence of ethnic differences in bone mineral status between British and Gambian adults resident in the United Kingdom. *Bakary Dibba, Ann Prentice, M. Ann Laskey & Dorothy M. Stirling* 143A
Influence of nutrient intake on bone mass in hip osteoarthritis and hip fracture patients. *Susan A. New, Alison Stewart, David A. Grubb & David M. Reid* 144A
Erythrocyte folate analysis; effect of pH of ascorbic acid diluent, point of deconjugation, and length and temperature of haemolysate storage. *Anthony J. A. Wright, Juan M. Romera, Paul M. Finglas & Susan Southon* 145A
Response of static and functional status variables to folate repletion in depleted rats. *C. A. Martin & P. J. A. Sheehy* 146A
Changes in erythrocyte folate status in response to increasing levels of pteroylglutamic (folic) acid supplements; implications for preventing neural tube defects. *Geraldine J. Cuskelly, Helene McNulty & John M. Scott* 147A
The response of plasma homocysteine to low-dose pteroylglutamic (folic) acid supplementation in healthy male subjects. *M. Ward, H. McNulty, J. M. McPartlin, J. J. Strain, D. Weir & J. M. Scott* 148A
The effects of oral vitamin supplementation on cardiovascular risk factors. *J. V. Woodside, J. W. G. Yarnell, I. S. Young, D. McMaster, K. F. Gey, C. Mercer, C. C. Patterson, E. E. McCrum & A. E. Evans* 149A
Macronutrient intake of Glaswegian adults compared wtih Scottish Nutrient Targets. *Annie S. Anderson, Linda Maher & M. E. J. Lean* 150A
Differences in macronutrient intake after changing to a vegetarian diet. *Frances Robinson & Allan Hackett* 151A
Dietary changes made by vegetarians and non-vegetarians during pregnancy. *Rana E. Drake, Sheela Reddy & G. Jill Davies* 152A
An index of fruit and vegetable consumption: data from the UK lone-parent nutrition survey. *Elizabeth A. Dowler & Claire Calvert* 153A
Do the increased weight-gain recommendations for pregnancy predispose parous women to obesity? *Helen E. Harris, George T. Ellison, Mary Holliday & Emy Lucassen* 154A
Food and nutrient intakes of council nursery-school children in Sheffield. *Rachel S. Bond & Jane Earland* 155A
Should caution be exercised in advocating reducing intakes of sugars in children? *T. R. Kirk & C. H. S. Ruxton* 156A
Frequency of consumption of biscuits, cakes and confectionery: relationship with nutrient intake. *Susan A. New & David A. Grubb* 157A
The relationship between confectionery consumption, physical activity and body mass index (BMI) in a Scottish population. *C. Bolton-Smith & M.-K. McCluskey* 158A
Obesity and social class in women: effects of smoking, drinking and physical activity. *Susan A. Jebb, Andrew M. Prentice & Timothy J. Cole* 159A

4–5 September 1996

Effect of protein degradability on protein splanchnic metabolism in dairy cows. *Hélène Lapierre, Jean-Philippe Blouin, Gerald E. Lobley, Chris K. Reynolds, Pascal Dubreuil & Jean-François Bernier* 162A
Effect of lysine deficiency on protein splanchnic metabolism in growing pigs. *Nicole Roy, Jong-Tseng Yen, Hélène Lapierre, John A. Rathmacher, Steven L. Nissen & Jean-François Bernier* 163A

CONTENTS

Whole-body protein metabolism in cattle fed on grass silage and dried grass at different intakes. *H. M. R. Greathead, J. M. Dawson, V. A. Sessions, F. N. Tye, N. D. Scollan, A. B. McAllan & P. J. Buttery* 164A

Preventing the insulin-induced fall in amino acids via variable infusion of an amino acid mixture increases the glucose response to insulin in sucking pigs. *Diane Wray-Cahen, Philip R. Beckett, Hanh V. Nguyen, Peter J. Reeds, Debbie Allnutt & Teresa A. Davis* 165A

The effect of dietary protein on mammary nutrient uptake and milk production. *Z. K. Rajczyk, I. J. Lean & J. M. Gooden* 166A

A technique for measuring arterio–venous difference, including blood flow, in the mammary gland of the sow. *Neil J. Gannon, Ronald A. Parr, Douglas J. Kerton & Frank R. Dunshea* 167A

Effects of dietary protein levels and porcine growth hormone administration on plasma concentrations of insulin-like growth factor binding proteins in growing pigs. *X. F. Guan, J. M. Brameld & P. J. Buttery* 168A

Increased body-weight gain of growth-hormone-treated newborn pigs is not due to increased rates of protein synthesis. *Timothy J. Wester, Douglas G. Burrin, Teresa A. Davis, Marta L. Fiorotto & Xiaoyan Chang* 169A

The effects of ruminal degradable nitrogen intake and *in vitro* addition of ammonia and propionate on the metabolic fate of L-[1-^{14}C]alanine and L-[^{15}N]alanine in isolated ovine hepatocytes. *T. Mutsvangwa, J. G. Buchanan-Smith & B. W. McBride* 170A

The incorporation of [5-^{15}N]glutamine into protein and nucleic acids in intestinal and other tissues in lambs. *J. J. Gate, D. S. Parker & G. E. Lobley* 171A

Effect of duodenal essential amino acid infusion on milk yield and composition in lactating dairy cows. *L. A. Crompton, C. K. Reynolds, M. A. Lomax, B. J. Bequette, F. R. C. Backwell, J. D. Sutton, J. C. MacRae & D. E. Beever* 172A

Effect of changes in insulin status during intravenous infusions of amino acids on milk protein secretion in dairy cows. *L. A. Crompton, M. A. Lomax, J. A. Metcalf, C. K. Reynolds, B. J. Bequette, F. R. C. Backwell, G. E. Lobley, J. D. Sutton, J. C. MacRae & D. E. Beever* 173A

Effect of glucose and amino acid infusions on hindlimb protein turnover in undernourished lambs. *L. A. Crompton & M. A. Lomax* 174A

Effect of close arterial cimaterol infusion on hindlimb protein turnover in lambs. *L. A. Crompton, J. Brown & M. A. Lomax* 175A

Effect of lysine deficiency on whole-body protein metabolism in growing pigs. *Nicole Roy, Hélène Lapierre & Jean-François Bernier* 176A

D-Aspartate transport by lactating rat mammary tissue. *I. D. Millar, D. T. Calvert, M. A. Lomax & D. B. Shennan* 177A

Temporal variation in plasma amino acid concentrations across the gut tissues of steers offered silage and silage–concentrate diets once daily. *A. R. G. Wylie, C. L. Thorp, D. J. Kilpatrick, R. W. J. Steen & J. D. McEvoy* 178A

The insulin response to exogenous glucose is decreased by a period of flushing in feed restricted anoestrus post-partum Charolais beef cows. *C. Ponsart, B. Khireddine, A. A. Ponter, B. Grimard, P. Humblot, D. Sauvant & J. P. Mialot* 179A

Peptide absorption across the ovine gastrointestinal tract: a methodological comparison. *Laurence Bernard, Dana L. Wilson, Vivien Buchan & F. R. Colette Backwell* 180A

Response of isolated mohair secondary follicles to epidermal growth factor *in vitro*. *M. Souri, H. Galbraith & J. R. Scaife* 181A

Nitrogen retention in Holstein steers offered isoenergetic rations containing increasing amounts of a blend of protein sources of low ruminal degradability. *T. F. Robinson, A. P. Moloney, D. H. Beermann, K. D. Finnerty & D. G. Fox* 182A

Exogenous xylanase (*EC* 3.2.1.8) improves digestion of protein, fat and energy and ultilization of protein in rye-based diets for broilers. *S. S. P. Silva & Ron Smithard* 183A

Influence of feeding acetylated peptides on fermentation and peptidase activities in the sheep rumen. *M. W. Witt, C. J. Newbold & R. J. Wallace* 184A

CONTENTS

Comparison of urinary purine derivative excretion with the flow of purine bases at the duodenum of lactating dairy cows. *R. J. Dewhurst, S. N. Lewis, M. S. Dhanoa & R. T. Evans* 185A

Nitrogen balance and rumen microbial nitrogen supply measured in Zebu bulls given young or mature Napier grass (*Pennisetum purpureum*). *A. Ayala & F. D. DeB. Hovell* 186A

Estimation of gastrointestinal passage rates of different plant components in ruminants using isotopically-labelled plant wax hydrocarbons or sprayed even-chain n-alkanes. *R. W. Mayes, J. Giraldez & C. S. Lamb* 187A

15–16 October 1996

Comparison of the hepatic uptake and metabolism of chylomicron remnant triacylglycerol in rats fed on saturated and unsaturated fats. *Marc S. Lambert, Michael Avella, Kathleen M. Botham & Peter A. Mayes* 189A

Postprandial generation of acylation stimulating protein by human adipose tissue *in vivo*. *Katherine Cianflone, Allan D. Sniderman, Lucinda K. M. Summers, Barbara A. Fielding & Keith N. Frayn* 190A

Increased activation of clotting factor VII without apparent increase in clotting factor XII activation following a test meal enriched in oleic acid. *Francesca Oakley, T. A. B. Sanders & G. J. Miller* 191A

Treatment with statins reduces apoprotein B-48 in the Sf-20-400 fraction of plasma. *J. Wright , J. D. R. Reckless, C. M. Williams, C. A. Stirling, D. Cole, S. Sethi & B. J. Gould* 192A

Effect of high- and low-fat meals on postprandial lipid metabolism in healthy adult volunteers. *Rebecca Moore, Christopher J. Seal & John C. Mathers* 193A

Postprandial lipid partitioning and obesity. *Alexander L. MacNair* 194A

The effect of apolipoprotein H (β_2 glycoprotein-I) on the rate of activation of factor XII on the surface of emulsions of albumin with fatty acids. *A. F. Sarphie & M. P. Esnouf* 195A

Effect of platelet-activating factor on lipid oxidation in the isolated working rat heart. *Xin Wang & Rhys D. Evans* 196A

The gastrointestinal handling and postprandial metabolism of [1-^{13}C]palmitic and [1-^{13}C]oleic acids in healthy women. *A. E. Jones, R. D. Smith, J. A. Nurmi, P. Hameen-Anttila, J. L. Murphy & S. A. Wootton* 197A

Increased proton leak in liver mitochondria from obese mice compared with lean controls. *Richard K. Porter, Siobhan M. McBennett, Zoe I. MacDonald & J. F. Andrews* 198A

The measurement of emulsion particle hydrolysis by lipoprotein lipase (*EC* 3.1.1.34) using a fluorescence displacement assay: effect of cholesterol on activity. *L. Isabel B. Lobo & David C. Wilton* 199A

Characteristics of chylomicron clearance across human adipose tissue in healthy individuals. *Barbara A. Fielding, Lucinda K. M. Summers, Vera Ilic & Keith N. Frayn* 200A

The effect of triacylglycerol fatty acid positional distribution on postprandial metabolism. *Lucinda K. M. Summers, Barbara A. Fielding, Vera Ilic & Keith N. Frayn* 201A

Lipoprotein lipase transport in plasma: role of muscle and adipose tissues in regulating plasma levels of lipoprotein lipase. *Fredrik Karpe, Keith N. Frayn, Sandy M. Humphreys, Gunilla Olivecrona & Thomas Olivecrona* 202A

Differences in postprandial lipaemia in response to standard meals in Southern and Northern Europeans. *J. A. Lovegrove, K. G. Jackson, A. Zampelas, B. J. Gould, M. J. Gibney, H. Roche, A. Kafatos & C. M. Williams* 203A

Postprandial lipaemia in endurance- and sprint/strength-trained athletes. *J. E. M. Lawrence, S. L. Herd & A. E. Hardman* 204A

Moderate-intensity exercise, postprandial lipaemia and muscle lipoprotein lipase activity. *S. L. Herd, A. E. Hardman & L. H. Boobis* 205A

CONTENTS

The relationship between birth weight and energy and macronutrient intakes, physical activity and body mass index in British teenagers aged 16–17 years. *H. David McCarthy & Helen F. Crawley* 206A

GLP-1 section is reduced in obesity and levels are modulated by circulating non-esterified fatty acids. *J. Wright, L. Ranganath, L. M. Morgan, F. Norris & V. Marks* 207A

Isoenergetic exchange of monounsaturated for saturated fatty acids: effects on fasting triacylglycerol and total cholesterol levels. *J. M. E. Knapper, A. Zampelas, D. H. Webb, C. N. Brooks, A. Lawrence, J. A. Tredger, L. M. Morgan, J. Wright & C. M. Williams* 208A

Postprandial lipid metabolism in women after reproductive cycles. *Maria de Lourdes C. F. Rodrigues & Teresa H. M. da Costa* 209A

The association of factor XIIa with lipoprotein particles in plasma. *A. F. Sarphie, L. K. M Summers & M. P. Esnouf* 210A

Surgical correction of postprandial dyslipidaemia. *D. J. Owen, A. Carmichael, R. F. G. J. King, I. G. Martin, H. Sue-Ling & D. Johnston* 211A

Transient triacylglycerolaemia in healthy normolipidaemic men alters particle composition and increases cellular processing of large very-low-density lipoproteins by low-density lipoprotein receptor *in vitro*. *Johan Björkegren, Fredrik Karpe & Anders Hamsten* 212A

3–5 December 1996

Requirements of the general hospital population: experience with 977 consecutive patients. *J. Kondrup, B. S. Hansen, B. Ipsen & H. Ronneby* 214A

Nutritional requirements of the intensive care patient. *Richard D. Griffiths* 215A

Does the mode of feeding play a role in the pathogenesis of enteral feeding-related diarrhoea. *Hamish D. Duncan, Simon J. Cole, Timothy E. Bowling & David B. A. Silk* 216A

Endoluminal brushing of central venous catheters a highly sensitive and specific technique for the in-situ diagnosis of catheter related sepsis. *B. M. Dobbins, P. Kite, M. J. Tighe, W. N. Fawley, D. Thomas, M. H. Wilcox, I. G. Martin & M. J. McMahon* 217A

The immune response to invading bacteria is impaired in neonates receiving parenteral nutrition. *Y. Okada, N. Klein, H. F. K. van Saene, A. Reynolds & A. Pierro* 218A

Early aggressive enteral nutrition (aEN) is associated with a reduction in major complications and length of hospital stay (LOS) in major burns. *Stephen J. Taylor & Sheila B. Fettes* 219A

Food provision, wastage and intake in elderly hospital patients. *Arlene D. Stephen, Charlotte L. Beigg, Edith T. Elliott, Ian A. Macdonald & Simon P. Allison* 220A

Intraoperative stress causes a different thermogenic and metabolic response in infants compared with children. *L. Fasoli, Y. Okada, P. Quant & A. Pierro* 221A

Measurement of collagen turnover using [^{15}N] or [^{13}C] proline by continuous flow combustion mass spectrometry. *M. J. Rennie, S. Downie, M. Ahmed, J. N. A. Gibson & W. Meier-Augenstein* 222A

Cholecystokinin release and gall-bladder contractility in neonates during parenteral and enteral feeding. *G. Jawaheer, M. Jordinson, J. Callam, N. J. Shaw, D. A. Lloyd & A. Pierro* 223A

Plasma glucagon-like peptide-1 (7-36) amide (GLP-1) response in healthy volunteers to liquid phase, solid phase and meals of differing lipid composition. *Audrey E. Brynes, Gary S. Frost, C. Mark B. Edwards, Mohammad A. Ghatei & Stephen R. Bloom* 224A

Differences in the glycaemic response to dextran and maltodextrin ingestion in man. *George K. Grimble, Erica E. Denholm, Simon M. Gabe & Edward S. Debnam* 225A

Measurement of total energy expenditure in patients with lung cancer and validation of the bicarbonate–urea method against whole-body indirect calorimetry. *E. Gibney, G. Jennings, S. A. Jebb, P. R. Murgatroyd & M. Elia* 226A

CONTENTS

The effect of flooding with the non-essential amino acid serine on human muscle protein synthesis. *K. Smith, N. Reynolds, A. Patel & M. J. Rennie* 227A

Changes in measures of fatigue in normal subjects following meals with varying amount of carbohydrate. *A. Cunliffe, I. Lamplough, R. Obra, O. A. Obeid & J. Powell-Tuck* 228A

Lack of an effect on intravenous glucose tolerance of 3 months of dietary supplementation with fish oil and monounsaturates in healthy middle-aged men. *A. N. Wijenaike, R. T. Jung, C. Bolton-Smith & M. J. Rennie* 229A

Comparison of electronic (Apple Newton MessagePad) and traditional paper visual analogue scales in studies of appetite and eating behaviour. *R. J. Stratton, D. Hughes, R. J. Stubbs & M. Elia* 230A

Investigation of protein metabolism *in vitro* using cultured skeletal muscle cells. *R. G. Roberts, C. P. F. Redfern & T. H. J. Goodship* 231A

A comparison between saliva and plasma urea and creatinine concentrations, and changes in deuterated water and bromide after oral dosing. *S. E. Jennings, G. Jennings, M. Elia & N. J. Fuller* 232A

Monitoring the severity of cystic fibrosis using multi-frequency bioimpedance. *B. H. Cornish, L. C. Ward, B. J. Thomas & R. Shepherd* 233A

Comparison of complications of two different-sized percutaneous endoscopic gastrostomy tubes. *Hamish D. Duncan, Margaret Bray, Suneil A. Kapadia, Timothy E. Bowling, Simon J. Cole, Simon M. Gabe, Emily R. Walters & David B. A. Silk* 234A

Predicting intra-abdominal fat mass measured by magnetic resonance imaging (MRI) from waist circumference in women: the influence of height. *Thang S. Han, Geraldine McNeill, Panos Baras & Margaret A. Foster* 235A

Single frequency bioimpedance at 50 kHz predicts changes in body water in multiple organ failure. *K. Foley, M. A. Keegan, D. Hancox, B. J. Pollard & I. T. Campbell* 236A

The ketoisocaproic acid breath test as a test of mitochondrial function. *Simon M. Gabe, Phillip G. Johnson, Roger Williams & David B. A. Silk* 237A

Phenotypic changes in Pseudomonas aeruginosa lipopolysaccharide grown in milk-based enteral feeds. *I. Hodgson, J. Stewart & L. Fyfe* 238A

Diurnal changes in measures of fatigue in normal subjects. *A. Cunliffe, O. A. Obeid & J. Powell-Tuck* 239A

The effect of surgical trauma on feeding behaviour in the rat. *A. R. Bosagh Zadeh & P. W. Emery* 240A

The thiamin, riboflavin and pyridoxine status of a randomly selected population of patients admitted through a London Accident and Emergency department. *C. P. Jamieson, O. E. Obeid & J. Powell-Tuck* 241A

Total antioxidant status of patients receiving total parenteral nutrition (TPN). *Malcolm Baines & Alan Shenkin* 242A

Diurnal changes in circulating concentrations of selected micronutrients in patients receiving cyclic nocturnal enteral tube feeding. *C. Baldwin, J. Shaw, G. Jennings & M. Elia* 243A

A comparison of artificial nutritional support in hospital and community between two adjacent health districts. *C. Baldwin, H. Rollins, O. E. Dewit, S. Cottee, G. Boyle, N. Simmonds & M. Elia* 244A

Home parenteral nutrition: how long do catheters last? *J. P. McWhirter, N. Reynolds & C. R. Pennington* 245A

The Interlink™ reduces the cost of cyclical parenteral nutrition. *J. P. McWhirter, J. Tait & C. R. Pennington* 246A

Complications on home parenteral nutrition are significantly increased in opiate and sedative dependent patients. *David M. Richards, Nigel A. Scott, Jon L. Shaffer & Sir Miles Irving* 247A

The results of outcomes research on home parenteral nutrition. *David M. Richards, Jon J. Deeks, Trevor A. Sheldon & Jon L. Shaffer* 248A

CONTENTS

Nutritional adequacy of a standard parenteral nutrition formulation (SPNF) in preterm infants. *S. A. Wright, H. Evans, E. Logie, S. A. Hudson & G. Menon* 249A

Diversity of bacterial flora involved in gut translocation in man. *C. J. O'Boyle, M. D. Palmer, C. J. Mitchell & J. MacFie* 250A

Percutaneous endoscopic gastrostomy (PEG) in Birmingham Heartlands Hospital (BHH): assessment of the effectiveness and outcome of one dose of prophylactic antibiotics prescribed before PEG placement; evaluation of nursing care of stoma site and monitoring of patient outcome. *H. Arrowsmith & M. Tracey* 251A

Cyclical peripheral parenteral nutrition: an audit. *M. D. Palmer, C. J. Mitchell & J. MacFie* 252A

Occluded long-term intravenous feeding lines: can they be salvaged? *J. Morley, A. Myers & J. L. Shaffer* 253A

Hospitals with nutrition support teams are more likely to have a nutritional assessement policy and ward nurses who identify 'at risk' patients than those that do not. *Annmarie Daniels & John Wright* 254A

Nursing support offered to stroke patients at mealtimes: a direct, non-participant observation study. *Susan M. McLaren, John W. T. Dickerson & John Wright* 255A

Implementation of a training programme for the insertion of Percutaneous Endoscopic Gastrostomy tubes through the anterior abdominal wall. *C. C. Hepworth, S. P. Burnham, S. Barton, M. Newton, S. Middleton & W. R. Burnham* 256A

The adsorption of micronutrients in Total Parenteral Nutrition (TPN) mixtures to end-line filters. *Michael C. Allwood, Helen Martin. Gil Hardy & Bruce McElroy* 257A

Influence of the amino acid source on ascorbic acid stability on Total Parenteral Nutrition (TPN) mixtures. *Melanie L. Kearney, Michael C. Allwood, Trevor Neal & Gil Hardy* 258A

Could standard parenteral nutrition solutions be used for the newborn instead of computer-generated individual prescriptions? *Christina Beecroft, Helen Martin & John W. L. Puntis* 259A

Filterability of parenteral nutrition admixtures and emulsions. *C. A. Granger, K. M. Wilkins, M. Latter, A. J. Hunter & J. Cohen* 260A

Plasma trace element concentrations during paediatric parenteral nutrition. *George H. Priest, Julie Coore, Helen Martin & John W. L. Puntis* 261A

Effectiveness of alcohol swabbing and use of disposable gloves in reducing microbial contamination during the assembly of enteral feeding systems. *L. McRobbie, A. Anderton, J. McKinlay & A. Robertson* 262A

Knowledge of nutrition and its application within a children's hospital. *Sara McDowell & Michael R. Green* 263A

Starvation in the midst of plenty: the development of a nutrition screening tool to identify patients at risk of malnutrition. *Ann Ashworth & Chris Wright* 264A

Nutritional status of patients admitted for elective surgery. *Lisa Harrison* 265A

Changes in nutritional status and pulmonary function in adults with cystic fibrosis. *Helen G. Musson, Janice Abbott, Mary E. Dodd & A. Kevin Webb* 266A

Patients at risk of malnutrition. *Jackie Edington* 267A

Audit tools for identifying the 'at-risk' patient in hospital. *Jeremy M. D. Nightingale* 268A

British Association for Parenteral and Enteral Nutrition guidelines and standards of practice in home enteral tube feeding: are they being met? *Sarah J. Whittingham* 269A

Influencing the policy makers: a guide to decision makers in health and nutrition in the UK. *Patrick Parker* 270A

Malnutrition: can we screen for it. *Janet K. Curwell, Moira J. Dixon & Ian Rawlins* 271A

The nutritional assessment of renal patients. *G. H. Hartley, I. R. Lawrence, A. L. Brown, J. S. Tapson & R. Wilkinson* 272A

Audit of nutritional supplements within three general practices. *Lisa Cooper* 273A

Effect of a new mixed-fibre-supplemented enteral formula on healthy volunteers' bowel function. *Emily R. Walters, Hamish D. Duncan, Ceri Green & David B. A. Silk* 274A

CONTENTS

Dietary treatment of hepatic encephalopathy: a survey of current practice. *Clare T. Soulsby* 275A

11–14 July 1995

Growth and nutritional status of Aboriginal children in the Kimberley region of Western Australia from 1969–1993. *E. K. Rousham & M. Gracey* 277A
Sex differences in nutritional status in rural Bangladesh: the influence of socio-economic status. *E. K. Rousham* 278A

5–7 December 1995

Growth in rural Gambian infants is closely related to small-intestinal permeability: Why? *P. G. Lunn, C. A. Northrop-Clewes & R. M. Downes* 280A

19 February 1997

The effect of early nutritional supplementation with Nutrifil or Corn Soya Blend on the nutritional and immune status of adults with HIV infection in Uganda. *G. James Bakeine, Paul M. Mathias & Peter N. Mugyeni* 282A
Haem and non-haem iron intake in Britain. *Kerina I. Tull, Susan M. Church & Anita J. Crosby* 283A
Iron absorption from fortified breakfast cereals. *Catherine Geissler & Georgina Agbley* 284A
The effect of a new fermented milk product on total plasma cholesterol, LDL-cholesterol and apolipoprotein B concentrations in middle-aged men and women. *Victoria A. Sessions, Julie A. Lovegrove, Gary R. J. Taylor, Tracey S. Dean, Christine M. Williams, Thomas A. B. Sanders, Ian A. Macdonald & Andrew M. Salter* 285A
Influence of a short period of de-training on postprandial lipaemia and insulinaemia in endurance-trained individuals. *Janet E. M. Lawrence, Sara L. Herd, Adrianne E. Hardman & M. Harrison* 286A
Quercetin is a potent inhibitor of oxidative damage to human LDL isolated from fresh and frozen plasma. *James O'Reilly, Lucie Pollard, David Leake, Tom A. B. Sanders & Helen Wiseman* 287A
Antioxidant activity of wine polyphenols *in vivo*. *S. Nigdikar, N. R. Williams & A. N. Howard* 288A
Supplementation with olive oil: effect on membrane fatty acid composition and platelet aggregation. *I. Vicario-Romeo, D. Malkova, E. K. Lund, J. C. Stanley & I. T. Johnson* 289A
Day-to-day variation in fat intake of high and low fat consumers: implications for understanding the relationship between dietary fat intake and obesity. *Jennie I. Macdiarmid, Janet E. Cade & John E. Blundell* 290A
Stimulation of fat intake by meat extract. *Jane Vigus & Catherine Geissler* 291A
Consequences of perceived food intolerance for nutrient intake. *Aisling Armstrong, Anita Macdonald, Ian W. Booth, Rosemary Platts, Rebecca Knibb & David Booth* 292A
A blind comparison of the effects of fat and carbohydrate on appetite and mood. *Marie Reid & Richard Hammersley* 293A

7–8 April 1997

The effect of various dietary copper intakes on pyridinium crosslinks of collagen in the rat. *Kevin Cashman, Annette Creedon & Albert Flynn* 295A
Effect of increased dietary sodium intake on biochemical markers of bone metabolism in healthy young women who are sodium sensitive and sodium non-sensitive in terms of urinary calcium excretion. *Fiona Ginty, Albert Flynn & Kevin Cashman* 296A

CONTENTS

Osteoporotic X-ray signs and calcium intake among Beijing adolescent girls. *Xueqin Du, Heather Greenfield, David R. Fraser & Keyou Ge* 297A

Human milk immunoglobulin A (IgA) concentrations during the first year of lactation. *Helen M. L. Arthur, James E. G. Bunn, Julian E. Thomas & Lawrence T. Weaver* 298A

Free-choice feeding and energy metabolism of growing broilers at moderate (20°) and high (30°) ambient temperatures. *M. A. Al-Harthi & M. G. MacLeod* 299A

Effects of a traditional anti-diabetic plant, *Sambucus nigra* (elder), on glucose metabolism and insulin secretion *in vitro*. *Alison M. Gray & Peter R. Flatt* 300A

Nutrient sources of phylloquinone (vitamin K_1) in Scottish men and women. *S. T. Fenton, R. J. Price, C. Bolton-Smith, D. Harrington & M. J. Shearer* 301A

Correlation of fruit and vegetable intake of 8–9 year old children and their mothers: preliminary results from a study of family eating patterns. *W. L. Wrieden & P. Longbottom* 302A

Nutrient intake in Scottish adolescents. *N. R. Belton, A. D. L. Macvean, N. D. Richards, R. A. Elton, W. M. U. Moffat & T. F. Beattie* 303A

Selenium status and selenoprotein function in a Scottish population. *K. M. Brown, K. Pickard, F. Nicol & J. R. Arthur* 304A

Copper and glutathione peroxidase (GSHPx) responses in lambs given a sustained-release rumen bolus. *R. Gordon Hemingway, James J. Parkins & Norman S. Ritchie* 305A

Secretion of milk with mastitis-like appearance from cows and sows given sesame expeller meal. *R. Gordon Hemingway, the late J. Scott Inglis & the late Andrew Waterston* 306A

Dietary modifications to increase food utilization and growth rate in broiler chickens exposed to high ambient temperature (30°). *M. A. Al-Harthi & M. G. MacLeod* 307A

Clinical practices that undermine the effectiveness of growth monitoring in primary health care. *Kirstie Rendall-Mkosi, George T. H. Ellison & Peggy Broekman* 308A

The effect of weaning on fermentation capacity in formula-fed infants. *A. M. Parrett & C. A. Edwards* 309A

Associations of indices of adiposity with features related to the metabolic syndrome X. *Naveed A. Sattar, Thang S. Han, Michael E. J. Lean, James Shepherd & Chris J. Packard* 310A

Separate influences on resting energy expenditure and thermogenesis in obesity. *Kevin M. Walsh & Michael E. J. Lean* 311A

Energy balance during acute exacerbations in children with cystic fibrosis. *J. M. Ralston, J. J. Reilly, J. Y. Paton, J. Wilkinson, J. Evans, C. A. Edwards & L. T. Weaver* 312A

Sociodemographic differences in infant feeding practices amongst children from Johannesburg and Soweto enrolled in South Africa's Birth to Ten study. *George T. H. Ellison, Lucy Wagstaff & Thea De Wet* 313A

Impact of altered taste sensitivity on dietary intake of patients with advanced cancer. *R. M. Pattison, R. A. Richardson, H. Dougan & H. I. M. Davidson* 314A

How do caterers rate 'healthy' foods? *T. Grant, A. Wise & G. Blwyddin* 315A

Energy balance in pre-obese children treated for acute lymphoblastic leukaemia. *J. Ventham, J. J. Reilly, J. M. Ralston, M. Donaldson & B. E. S. Gibson* 316A

16–18 May 1997

Do the energy intakes of adult budgerigars (*Melopsittacus undulatus*) and canaries (*Serinus canarius*) change with age? *E. J. Taylor, R. Obra, V. Kitchener & C. Reed* 318A

The proximate nutrient, gross energy and mineral composition of some seeds commonly fed to small psittacines and passerines. *E. J. Taylor* 319A

A study of the diet and food preferences of six captive lowland gorillas (*Gorilla gorilla gorilla*) with reference to breeding success. *Angelique F. Todd & Barry Stevens-Wood* 320A

Nutritional balance studies with pilchards and squid in Little penguins, *Eudyptula minor*. *T. L. Frankel* 321A

CONTENTS

Frugivorous primate diets in Kibale Forest, Uganda. *Nancy Lou Conklin-Brittain, Richard W. Wrangham & Kevin D. Hunt* 322A

Use of n-alkanes as markers for the study of digestive strategies in captive giraffes (*Giraffa camelopardalis*). *J.-M. Hatt, R. W. Mayes & M. Lechner-Doll* 323A

Research in nutrition at the Jersey Wildlife Preservation Trust. *Anna T. C. Feistner* 324A

4–5 September 1996

The effect of condensed tannins from heated and unheated cottonseed on the ileal digestibility of amino acids. *Feng Yu, P. J. Moughan, T. N. Barry & W. C. McNabb* 326A

3–5 December 1996

Are malnutrition and depression correlated in acutely ill elderly patients? *E. B. Medici, D. McCrea, B. Kaufman & G. Grimble* 328A
